

ARROW SEGMENT

These arrow shaped segments are designed for aggressive stock removal making it great for adhesive and coating removal. Has a 15mm segment height and is one of the most durable & longest lasting cup wheels. Use dry. 5/8"-7/8" bore.

4" KA1950

7" KA1950-7

PCD CUP

REMOVES THICKER COATINGS

4" KA1640

7" KA208

Poly Crystalline Diamonds make for extremely aggressive removal of glue, epoxy, mastics & the worst of the worst coatings. The hardest substance known to man stays sharper longer under extreme conditions. Use dry. 5/8"-7/8" bore.

REMOVES THINNER COATINGS

4" KA1700-4

7" KA1700-7

SHREDDER CUP

Carbide grit wheels perfect for removing paint, epoxy, urethane wax tile, adhesives and level set. Tungsten tips engineered to reduce loading, give long life and are easily cleaned. Perfect for detail work, walls, corners, etc.. 5/8" - 7/8" bore

4" KA3000

7" KA3500

T SEGMENT

Provides fast grinding action by U groove in segment on concrete & masonry that is so smooth it leaves little to no swirl marks. This aggressive cup will provide a longer life than most diamond cups on the market today. 5/8"-7/8" bore.

4" KA2450-4

7" KA2450-7

ABRADER TOOL

Removes Mastics, Adhesives, Epoxies & Urethanes, Thin sets, paints, and many other Gummy Coatings. Use to prep concrete floors, brick and metal. See More On Pages 22-23.

4.5" KA1049-4.5

7" KA1049-7

DIAMOND CUP "G"

Brazed Turbo bi-directional. Premium "L" pattern segments can be used wet or dry for better cutting and speed. Gives clean finish with minimal swirl. Use on floor machine or hand grinder. 18 Segments. 5/8"-7/8" bore.

4" KA2200

7" KA2250

SPIRAL

Use on valuable hard stone such as granite, quartzite, artificial decorative stone, marble, & concrete intended for polishing. 24 individual segments work aggressively as the segments are close together giving a smoother finish. 5/8"-7/8" bore.

4" KA2311-4

7" KA2311-7

SCARIFER "Shot Blast"

Carbide flails gives concrete that textured look with 7 carbide blades to abrade concrete, asphalt & stone. Abrades concrete in preparation for adhesives, paints or epoxy. Blades are replaceable. 5/8-11 adapter.

4" KA1625-C

7" KA1642-C

RHINO DISC

Aggressive designed with multi layers of silicon carbide abrasives that provide a fast removal of urethane coatings. Mastic, paint, epoxies, carpet glue and stucco (off of concrete). Plastic reinforced backing eliminates the need for a backer. GRIT 12, 16.

4" KA1650-GRIT

7" KA1654-GRIT

DIAMOND CUP

Diamond Cup Single Row 7"

7" KA1649

Industrial Diamonds make for extremely aggressive removal of glue, epoxy, mastics & the worst of the worst coatings. The hardest substance known to man stays sharper longer under extreme conditions. 5/8"-7/8" bore. 30 grit.

Diamond Cup Double Row 4" & 7"

4" KA1617-4

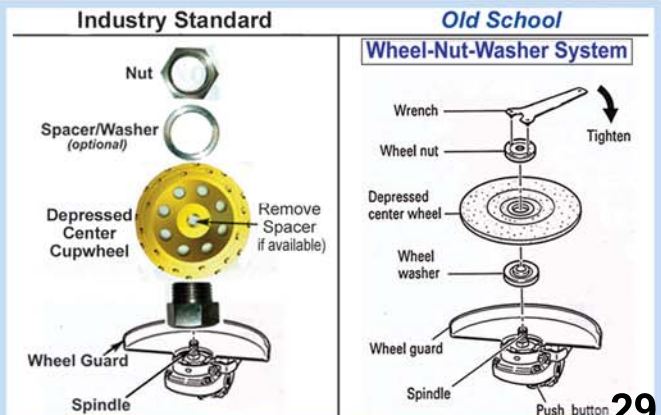

7" KA1617-7

ADAPTOR 7/8 BORE TO 5/8-11 THREAD

MPK2-S

Several years ago all the equipment manufacturers changed to a wheel/nut & washer system (see drawing at right). This created a stronger, more universal system of locking the cupwheel to the grinder. Today there are thousands of tool manufacturers around the world with tools of different thickness and offsets with no standard for manufacturers. The wheel/nut washer system with the spanner wrench is the universally accepted industry standard and safest system. Some contractors prefer the old type (5/8-11 threaded cup). We offer the MPK2-S adaptor. The contractor only needs to purchase it once and re-use over & over with other wheels or on other grinders, saving the customer and distributor money.
