

CARBO™ & CERAMIC BRUSHES

The Next Generation

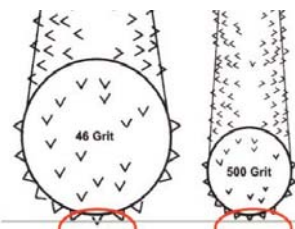

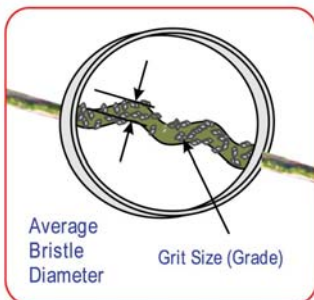

Refinishing Hardwood • Heavy Duty Stripping
Degreasing Concrete • Deburr Wood Scrubbing
Decontaminate Surfaces • Acid/Caustic Scrubbing

- Our "CARBO BRUSHES" span a large range of cleaning opportunities.
- Ceramic grits offer the premier quality abrasive grits impregnated into chemical resistant nylon bristles that are crimped and self replenishing as the brush wears, guaranteeing unmatched quality & durability.
- Water feed DuraBlock for extended life.
- CARBO BRUSHES won't gum up or clog like pads, discs or screens.
- Use less chemicals for stripping, degreasing and abrading • Last 100 times longer than pads.
- Bristle filaments range from .018" diameter (softest) to .065" diameter (hardest).
- Small filaments with smaller grits produce softer, finer finishes.
- Larger, more rigid filaments with coarser, larger grits enable greater force and pressure applied to the surface.
- Grits range from 46 (aggressive) to 500 (polish). As the grit increases, the brush gets softer, to work on uneven surfaces.
- 46 grit brushes replace black pads and are as aggressive as sandpaper.
- 500 grit brushes can replace white pads to achieve a soft polish.

Abrasive Bristle Choices

- 46 Grit x .065" Rust-Colored Bristle**
This is our most aggressive grit scrub brush, used for **extra heavy-duty** stripping and scrubbing of heaviest soils on the roughest floors. Replaces black pads. Must be used wet.
- 80 Grit x .050" Black Bristle**
Recommended for **heavy-duty** stripping and scrubbing of industrial floors, and effective cleaning of wide grout lines. Replaces black and brown pads. Must be used wet.
- 120 Grit x .040" Green Bristle**
For **general-duty** stripping and scrubbing of concrete, brick, terrazzo and quarry tile floors. Replaces green or blue pads. Must be used wet.
- 180 Grit x .035" Blue Bristle**
For **daily scrubbing** of resilient tile and finished floors, and ceramic, terrazzo, quarry tile and smooth coated concrete floors. Flexible enough for cleaning narrow grout lines and uneven surfaces. Replaces blue or red pads. Must be used wet.
- 500 Grit x .018" Gray Bristle**
This brush is recommended for **gentle scrubbing**, polishing, and spray buffing. Replaces red or white pads. Must be used wet.

CERAMIC BRUSHES 4"

FOR **SATELLITE**

Abrasive Brushes are Ceramic impregnated nylon bristles from 46-500 grit that expedite a large variety of cleaning and light abrading jobs. Combine them with the Satellite System and you will increase brush speed from 178 to 600 rpm's for greater floor coverage and speed. In addition the Satellite increases downward pressure by 50% speeding up the removal of newer extremely durable finishes. Ceramic impregnated bristles offer extended life. Designed for wood floor coatings and polished concrete.

CARBO BRUSHES

FOR **ROTARY & SCRUBBERS**

12", 14", 16", 17", 18", 19", 20"

SCRUBBING • STRIPPING • POLISHING

Replace those sanding disks, pads & screens for your rotary scrubber or floor machine with long-lasting Carbo Brushes. For every cleaning need from heavy duty stripping to gentle polishing. Won't gum up or clog like pads, discs or screens, and use less chemicals.
