

HEPA Concrete Dust Extractor

CES26
120V

Ideal for fine building, grinding, plaster and concrete dust.

- Jet Pulse cleans without opening vacuum
- Longopac® “drop-down” dust collection
- Dual 120V motors for powerful, fast pickup
- Non-marking wheels, lockable front casters

LONGOPAC®

**OSHA
Compliant**

Equipped with two tested and certified HEPA filters that trap the most dangerous dust particles and prevent them from being released in the air.

Conical Pre-Filter: stays clog free; cleans more thoroughly via jet pulse.

Manometer: measures the negative pressure within the tank and alerts the operator when the filters need servicing.

SPECIFICATIONS:

• 120V • 258 CFM • 3.4 HP • 18 Amps • 100" Water Lift • 103 lbs.

LONGOPAC®

72 ft. of continuous bags with tie wraps for easy and convenient dust & concrete containment. Each liner makes 25-30 bags.

Pull the bag down.

Attach two ties with a 5" gap.

Cut between the ties.
