

# For Concrete Polishing

## You Need a **PREDATOR** 2 in 1

The first tool to incorporate **A** 6-120 Grit trapezoidal grinding & honing stationary Diamond Tools and **B** 120-8500 Grit round rotating Resin Polishing Diamonds in one unique tool that can be used on a 120V standard floor machine OR a 240V Xtreme Pro Stone Polisher.

### The Best Tool From Start to Finish!

**A**

are fixed position tool mounts, often called Trapezoids. These tools are used for aggressive cutting and honing. Grits 6-120 Metal Bond Diamonds are used for steps 2-6.

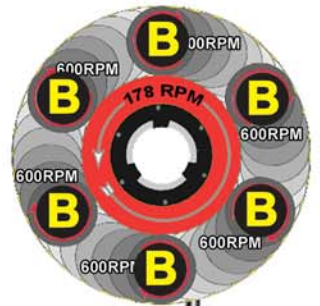

- Aggressive Polish & Prep 6-12 grit Grinding Diamonds
- Remove Deep Scratches 25-70 grit Grinding Diamonds
- Remove Heavy Scratches 100-200 grit for Prep & Polish

**B**

Unlike the "A" fixed position tools, the "B" tools rotate 600-1200 RPM, and are designed to be best for polishing. 120-8500 grit Resin Bond Diamonds are used for steps 7-12.

- Flattening Floor
- Fine Polish
- Floor Prep Polishing with Semi-Metal Diamonds

**A**

### NOTE: "A" and "B" tools CANNOT be used simultaneously.

## Magna Plate Quick Change Tools

- The most aggressive tools in the industry
- The exact same tools used on Industrial Grinders
- No broken or rusted bolts
- No wrenches needed to remove and install tools - they just snap
- Change tools in seconds - Save time, money and labor
- No need to skip grits or take shortcuts

## **B** Planetary Heads with Velcro Base

- Counter-rotate at 600RPM, 1200 RPM on a high-speed machine
- Can be used with standard diamonds
- Diamonds wear evenly for up to 30% longer diamond life
- High speed heads sling the grit and stone from under the diamond extending the diamond's life
- Can be used wet or dry
- Many diamonds are hook & loop backed for instant load and release, saving time, money and labor

**Fits Any Buffer**
