

Concrete Dust Clogging You Up?

CYCLONE MINI

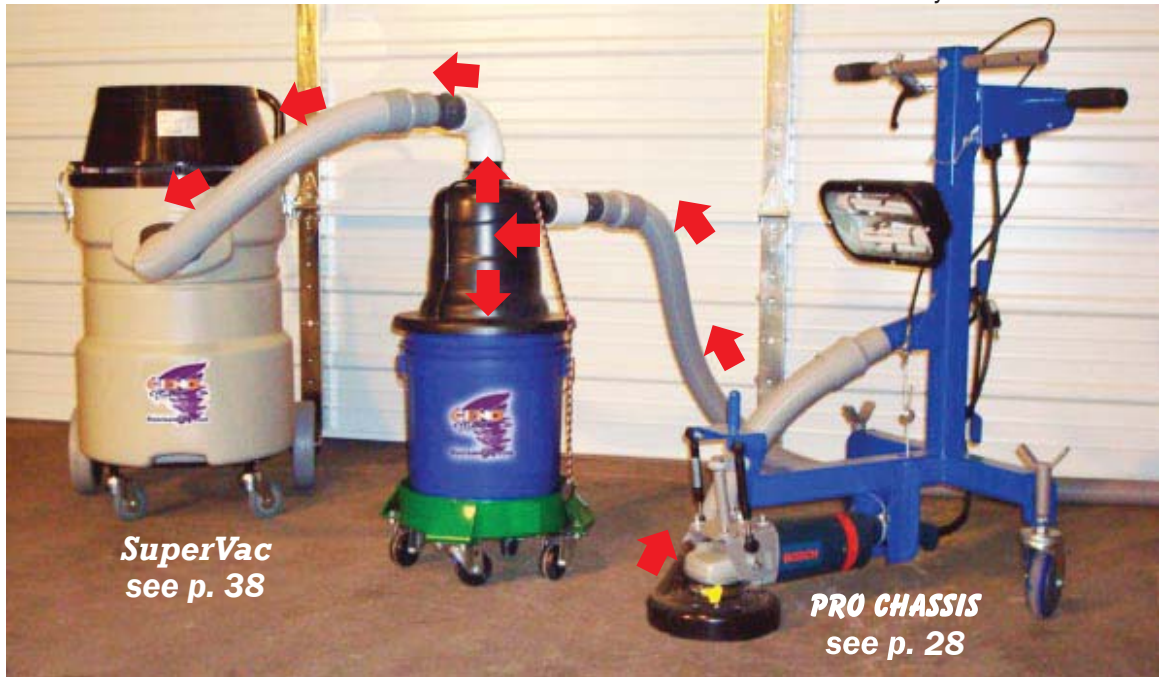

The low cost way to turn your Vac into an effective industrial dust collector

Debris falls into a 5 Gallon bucket for quick and easy carry away, or into plastic bag for easy disposal

- Removes 98% of concrete dust that passes through your grinder before it reaches your vacuum filter
- Extends motor & filter life & run time
- Reduces downtime cleaning filters
- Attaches to any vacuum
- Made of durable high density material, it holds up to abrasive concrete dust.
- **CYCLONE MINI** Includes 10 feet of hose and cuffs

10' Bucket & Dolly not included **VE550**

"Dolly Economy" Adjustable, 3 casters **VA569**

Plastic Bags 18x24 250 per case **VA559**

Shown with MaxVac S-UFF See p. 39 (Sold Separately)

Convert Your Vac to a Bagger!

Add a Separator/Bagger to your SuperVac for easy disposal

Separator - Equalizes vac pressure, allowing use of plastic bags to collect dust.

Bagger - Vac equalizer distributes negative air to both sides of the plastic bag, preventing damage to bag and filter. Allows use of plastic bags for easy and safe removal of contaminants.

Plastic Bags 40x48 100/roll **VP955**

Collect your dust in a plastic bag!

No more fighting to empty your vac!

Seperator 200

Ideal for use with SuperVac

- Stainless Steel Body
- Metal Chassis
- Includes 25 ft. of Hose

Vac required (sold separately)

Attach your vacuum at the top, and your sander or floor machine on the side. Separates fine dust before it reaches the vacuum, for a longer filter life and less downtime.

Seperator SS 200 - 15 Gallon **VE200**
